96523	Irrigation of Implanted Venous Access Device	1	**$125.00**

CLINICAL JUSTIFICATION

Patient has Stage IV metastatic melanoma with progression despite standard first-line therapies (pembrolizumab and ipilimumab). Patient has exhausted all FDA-approved treatment options. Current Eastern Cooperative Oncology Group (ECOG) performance status: 1. Based on preliminary Phase I trial data showing 38% response rate in refractory melanoma, patient was enrolled in investigational protocol with full informed consent. **Treatment is deemed medically necessary as patient has no other viable therapeutic options.**

Total Charges: **$45,975.00**

Insurance Payment:	**$0.00**
Insurance Adjustment:	**$0.00**
PATIENT RESPONSIBILITY:	**$45,975.00**

✕ CLAIM DENIAL NOTICE

Denial Code: EXP-001
Denial Reason: EXPERIMENTAL/INVESTIGATIONAL TREATMENT
Explanation: The drug J9999 (Neo-Immuno-X) is classified as investigational and is not FDA-approved for the treatment of melanoma. Your insurance policy specifically excludes coverage for experimental or investigational treatments, drugs, devices, or procedures that are:

- Not approved by the FDA for the specific indication
- Provided as part of a clinical research trial
- Not considered standard of care by national guidelines

Policy Reference: Section 7.2(f) - Experimental and Investigational Services Exclusion
Date of Determination: October 25, 2024
